

■ VoiceMed — Clinical Referral Letter

Patient: **Manoj** · Generated: 2026-05-18 21:30 UTC · AI-assisted triage · For clinician review

SEVERITY: EMERGENCY

Referral Details

Referral Note

Patient: Manoj

Severity: EMERGENCY

Clinical finding: Wound on leg with redness spread 3cm, stiff neck, patient hates bright light, fever for 2 days

Please assess and manage at the next available level of care.

Recommended Actions

- Apply direct pressure with clean cloth to control bleeding
- Do not remove any impaled objects
- Elevate injured limb if possible
- Wash hands with soap before touching wound
- Irrigate wound thoroughly with clean water or normal saline for at least 5 minutes
- Remove visible debris gently with forceps

This referral was generated by VoiceMed AI triage assistant. It is intended to support — not replace — clinical judgment. A qualified clinician must review and confirm all decisions.
